

Doosan Forklift Part

Doosan Forklift Parts - Doosan Infracore Company Ltd. is a transnational organization consisting of Diesel Engines, Defense Industry products, Industrial Vehicles, Construction Technologies and Machine Tools and Automation Systems.

In the U.S.A., Doosan Infracore America Corporation is headquartered in Suwanee, Georgia. It is home to a 170,000 square foot manufacturing facility, which is the home of the Compact Equipment and Construction division. West Caldwell, New Jersey is home to the Machine Tool division and Cleveland, Brownsville is home to the Lift truck division. The U.S. headquarters in Georgia facilitates a first rate parts operation capable of supplying an excess of 25,000 line items to support Lift Truck, Compact Equipment, Machine Tool and Construction customer needs.

There are well over 220 Doosan service and product sales locations operating in Canada and the United States. Also, there are more than 90 independent dealers moving lift truck supplies and materials handling equipment. This network allows Doosan Infracore America to aggressively compete in this competitive market. The lift truck product line remarkably comprises of 63 distinctive versions consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion forklifts. Capacities of these various vehicle versions vary from 3,000 to 33,000 lbs. All vehicles are manufactured in an ISO 9001 certified facility.

Doosan Infracore America is the fastest growing lift truck business in the North American market, due to their consistency in maintaining a high level of customer service quality and optimum product functioning to all Doosan Infracore Forklift users. The U.S. lift Truck division situated in Cleveland has a professional team experienced in Product Sales, Purchasing, Marketing, Logistical and Technical Support.

At first the domestic lift truck marketplace in Korea was an open import enterprise. Korea Machinery Co. Ltd. begun in 1960, to import fully assembled lift trucks as part of a domestic machinery expansion venture. Sales of these goods were primarily targeted to state-run companies, large scale organizations, and the armed forces. This eventually led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced trade operations throughout Korea to service and sell this heavy equipment. By 1978, a lift truck manufacturing plant was successfully completed. Continuous technical instruction grew to become the new focus for enhancing quality and product development.

Daewoo started the first home-based lift truck business in 1967, and rapidly gained a whopping 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's superior technological improvements combined with sales success placed them in a position of substantial growth of their forklift operations.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a joint venture project to help them in the highly competitive North American materials handling industry. This joint-venture proved highly profitable for Daewoo and their lift truck sales expanded greatly. In 1984, the company finished construction of a new facility to help in manufacturing high end value-added goods for export. In 1993, the corporation had a global sales system and started exporting versions they had established through in-house technology, as an independent brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion possibilities into international markets.
