

JLG Forklift Parts

JLG Forklift Part - Following retirement in the late 1960's, John L. Grove embarked on a cross country RV expedition. After spending many years establishing his family built crane company with his brother, John had no idea that this journey would give birth to the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling technologies was the end result of a road trip.

During their trip, John reacquainted himself with previous business connections along the way. In combination with these conversations and a significant event; two workers were unfortunately electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John uncovered a considerable marketplace for a product that could swiftly and securely elevate people in the air to accomplish upkeep and other building functions.

Following their return from holiday, John set up a partnership with two of his friends and obtained a metal fabrication company in McConnellsburg, Pennsylvania. Opening with a small crew of twenty staff, they fashioned and sold their first JLG aerial work platform in 1970. The company incorporates some of the basic design essentials of that original lift into current versions.

JLG forklifts have come a ways from the time when Mr. John L. Grove came back to town from his cross-country road trip and since the first aerial work platform debuted on the market. These days, the company proudly continues to expand itself into a range of markets globally and develops new products to make sure customers are capable of being more effective and perform in the workplace within a safer environment.
